

# Simple. Efficient. Comfortable.

Small buildings can now benefit from the sophisticated control of BCM's products at a price that ALL building owners can afford.

## With BCM's Small Building Solution, you:

- Become energy efficient
- Improve comfort
- Increase equipment life
- Identify mechanical problems quickly and easily
- Improve staff productivity

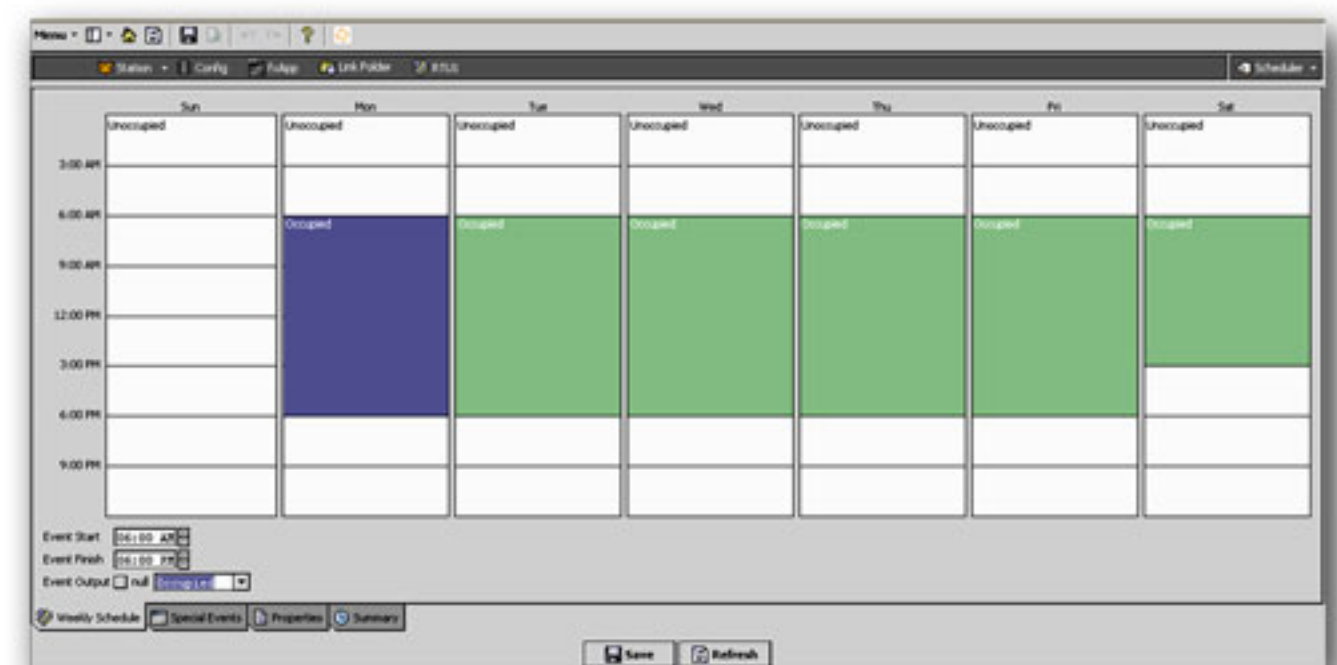

## Simple and Easy-To-Use Thermostats:

- Large LCD backlit display
- Local occupancy override button
- Easy to adjust setpoints
- Eliminate the lock box with multi level user access
- Pre-programmed and ready to install

## Web-Based Master Controller

- Access your site using Internet Explorer, PC or MAC, Windows XP, Vista or Windows 7
- Multiple users can simultaneously access the same system with no additional software
- Multi-level alarms can be emailed or text messaged to users
- 3D Animated Graphics include fans, coils, dampers, pumps, etc.
- 3D floor plans (optional)
- Affordable Scalability - pre-programmed field devices make build-outs and renovations easy and affordable!

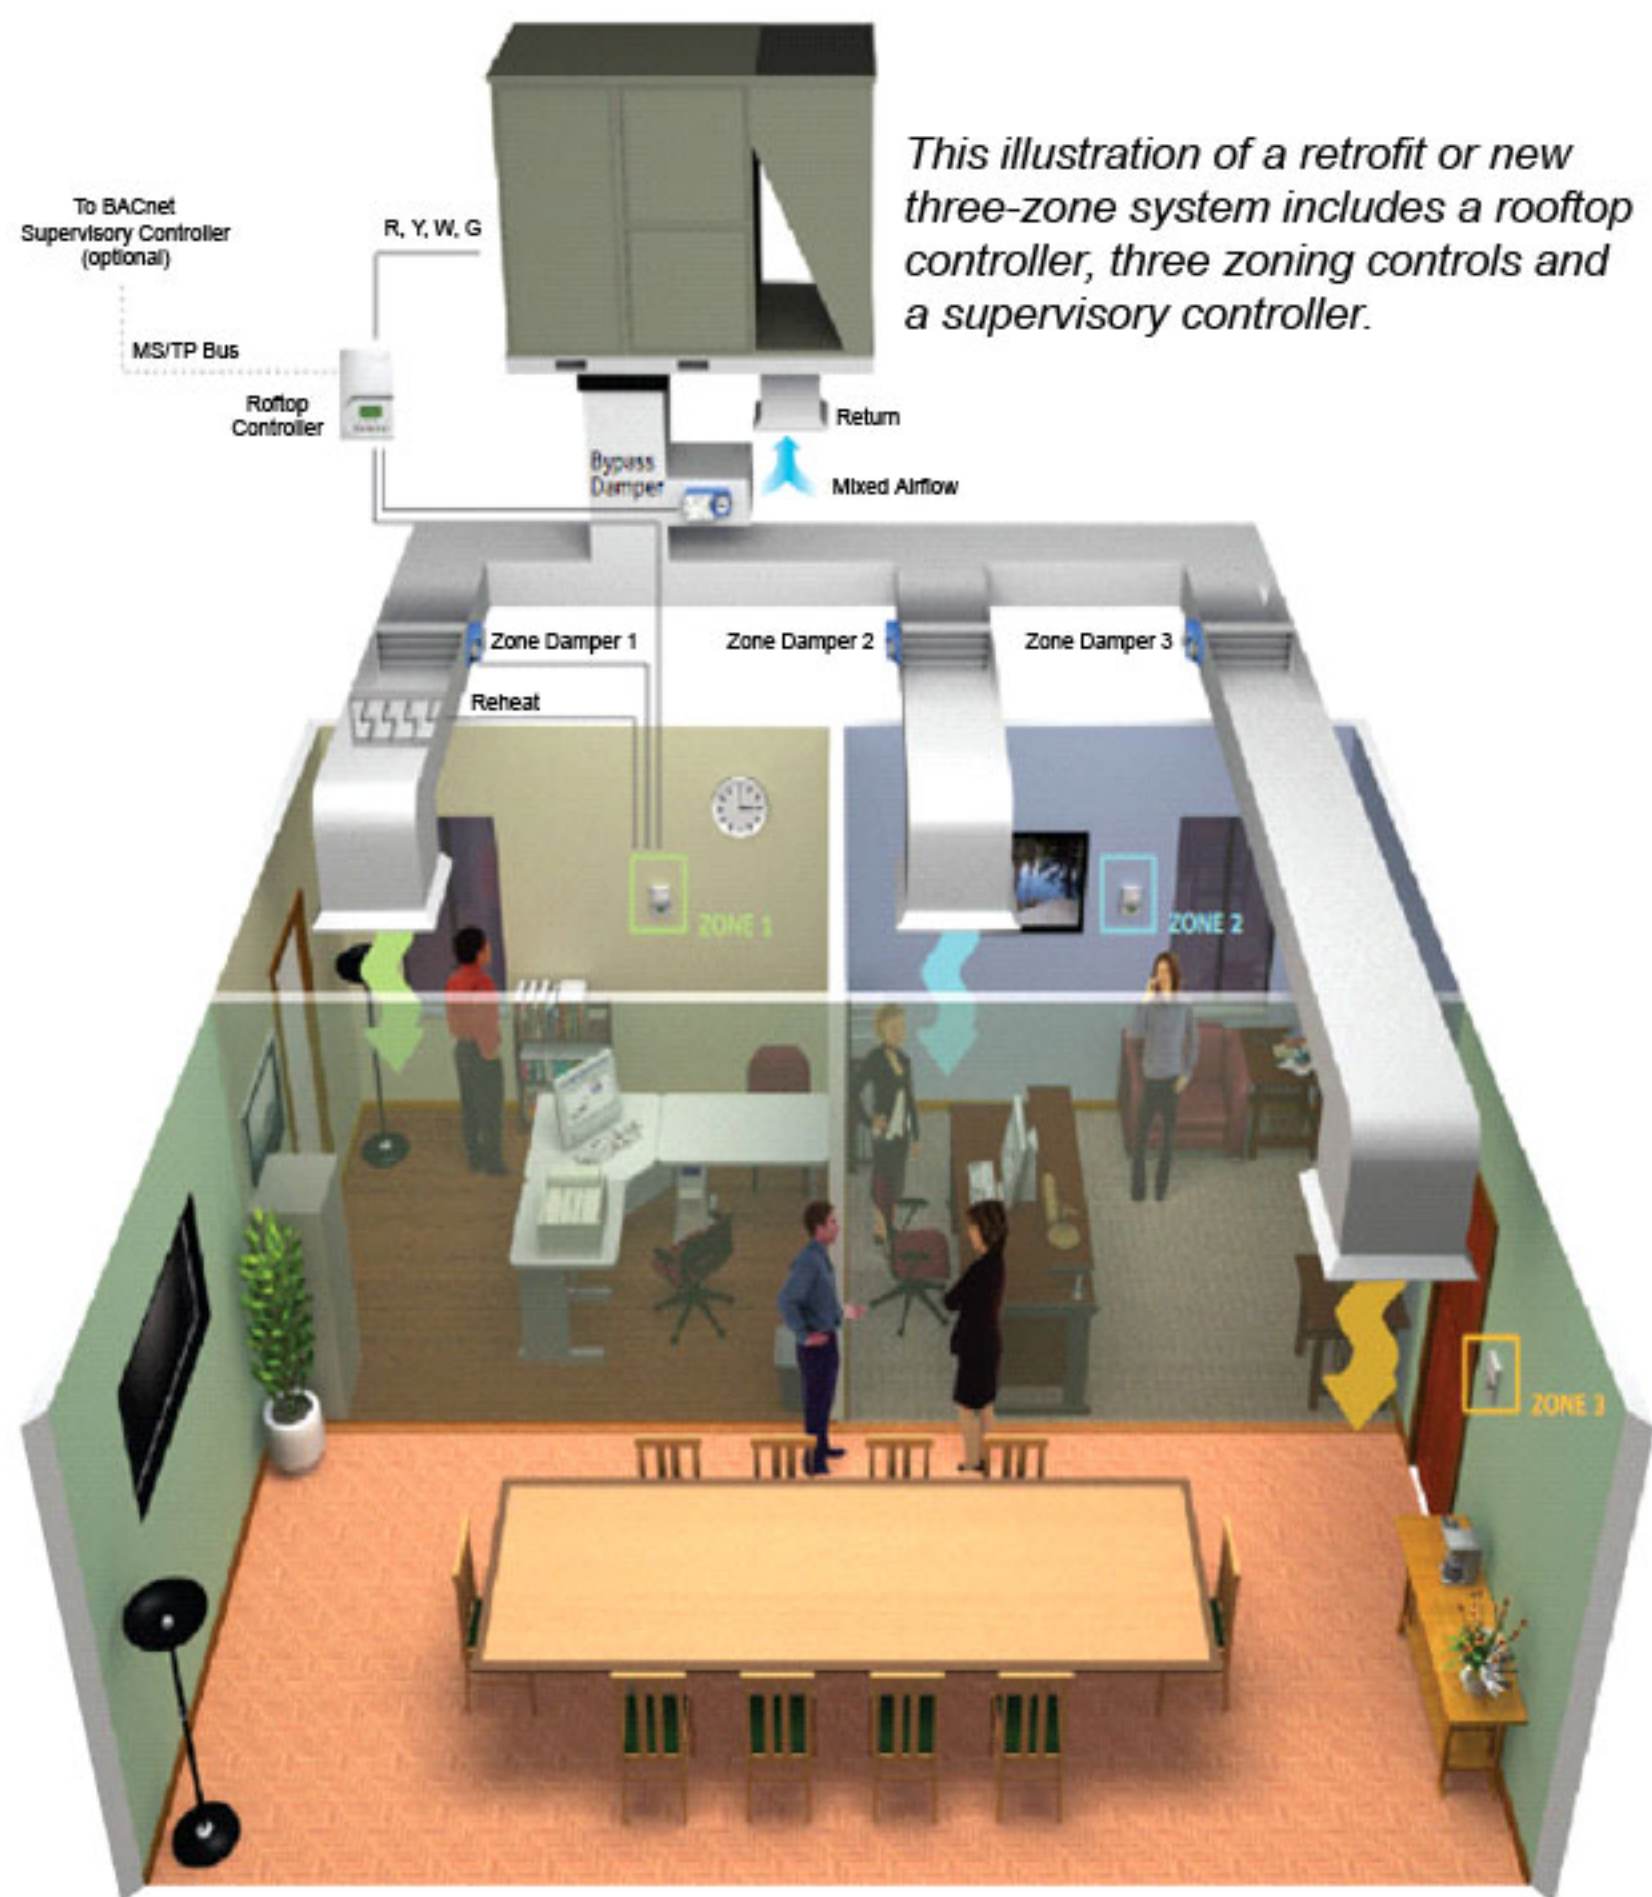

**Drag and Drop Scheduling** - access, create and modify weekly as well as special event schedules

## Zoning Control

BCM's Zoning Control System is a cost-effective product for constant volume, pressure dependent zoning systems with multi-zone heating and cooling applications.

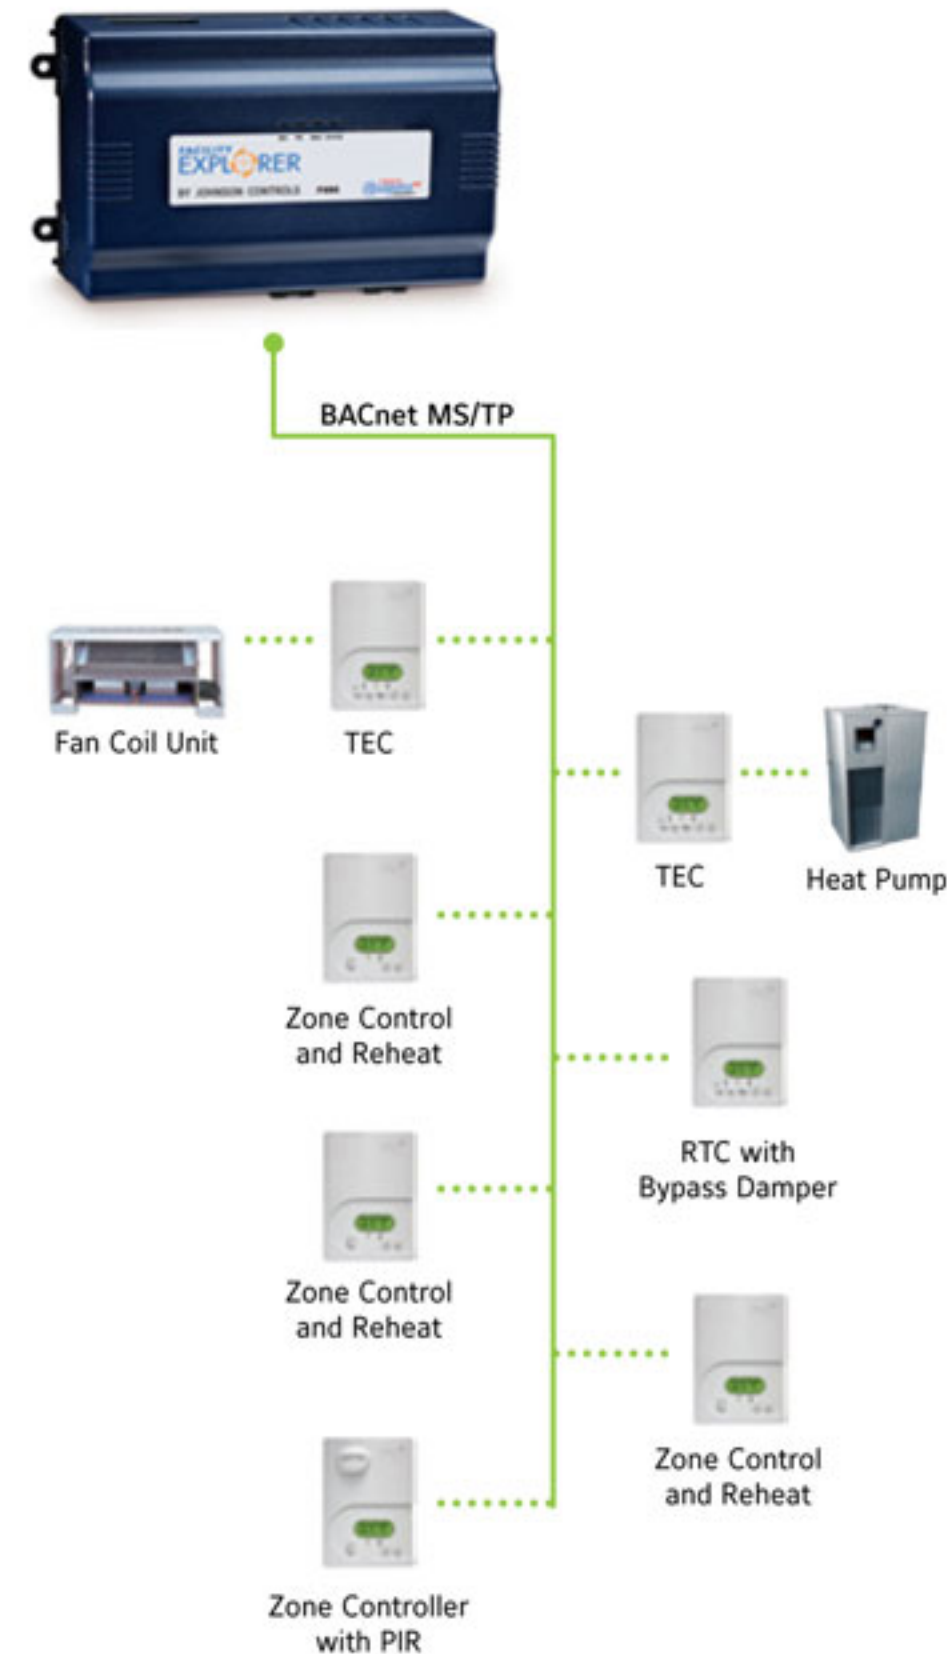

The Zoning Control System has a fully scalable network architecture utilizing BACnet® MS/TP. It can operate as a standalone zoning system, or it can operate with a Building Automation System (BAS) that enables remote monitoring and programmability.

This system is designed for retrofit projects and new construction. Typical applications include banks, retail facilities, churches, restaurants, office buildings and other multi-tenant facilities.

## Thermostat Applications Available

- Zone Dampers
- Radiation Valves
- Roof Top Units (up to 2 heat, 2 cool with economizer control)
- Heat Pumps
- Fan Coil Units (2 and 4 pipe)

## Handheld Access

Access your building via your iPhone®, iPod Touch®, or other handheld device. Check, adjust and address schedules, alarms, setpoints, etc.

No additional software needed!
