

Photo Album & Badge Printing Application for Andover Continuum™

The Andover Continuum Photo Album and Badge Printing application provides Andover Continuum users with a powerful interface to create and print custom formatted photo albums with personnel photos, signatures, and up to 100 attribute fields. With this easy-to-use utility, you can create a hard-copy dossier of all cardholders in your facility — perfect for departmental record keeping purposes or for quick and easy photo verification in the guard station or badging office.

Included also is a Badge Printing utility which allows you to print or reprint cardholder badges individually or in batches. The Badge Printing utility is fully compatible with Andover Continuum's Badge Manager program.

The Photo Album and Badge Printing application uses (and requires) the Andover Continuum database as the source of personnel information, and is installed on an Andover Continuum workstation.

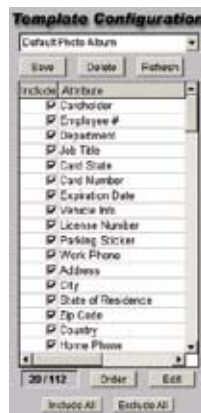

- Create and Print Custom Formatted Photo Albums with Signatures and Personnel Data
- User-Friendly “Point-and-Click” On-Screen Configuration
- Powerful Search Engine Lets You Select Records to Print using Multiple Criteria
- Include up to 100 Andover Continuum Standard and Custom Field Attributes
- Unlimited User Defined Photo Album Configurations
- Format Album Pages with One or Three Records Across
- Merge Field Attributes with a Text File for Single-Page Print-Out
- Export Photos to JPG Files
- Print or Reprint Cardholder Badges Individually or in Batches
- Fully Compatible with Andover Continuum Badge Manager
- Create Photo Albums from Access Event Exports

EASY, ON-SCREEN PHOTO ALBUM CONFIGURATION

Photo Album's “point-and-click” configuration screen makes creating a photo album quick and easy . Select the cardholders you want to display in the album using Photo Album's powerful, built-in search engine. Select by last name, by department, and/or select using filter criteria such as Visitors, Disabled Cards, Expired Cards, etc.

SIMPLE TEMPLATE SET-UP

Next select an existing photo album template or configure a new one. Template configuration is also simple. Select up to 100 Andover Continuum standard and custom attribute fields to include for each cardholder; for example, Department, Job Title, Parking Sticker, License #, etc.; and then select the order you want them to appear in the Photo Album.

Template Configuration Box

FORMATTING OPTIONS AVAILABLE FOR ALBUM PAGES

You can customize your photo album using several different formatting options. Add a title and heading, and choose to display or not display field labels, photos, and cardholder signatures. Records can be sorted alphabetically by last name or by department, and displayed in either a one-column or three-column format. Or you can create a custom, single page print-out for each cardholder by merging a text file containing additional personnel information with their existing photo and field data. This feature is perfect for pre-printed re-badging or security check requests.

After configuring your photo album pages, click the "Photo Album" button to review your album pages before printing.

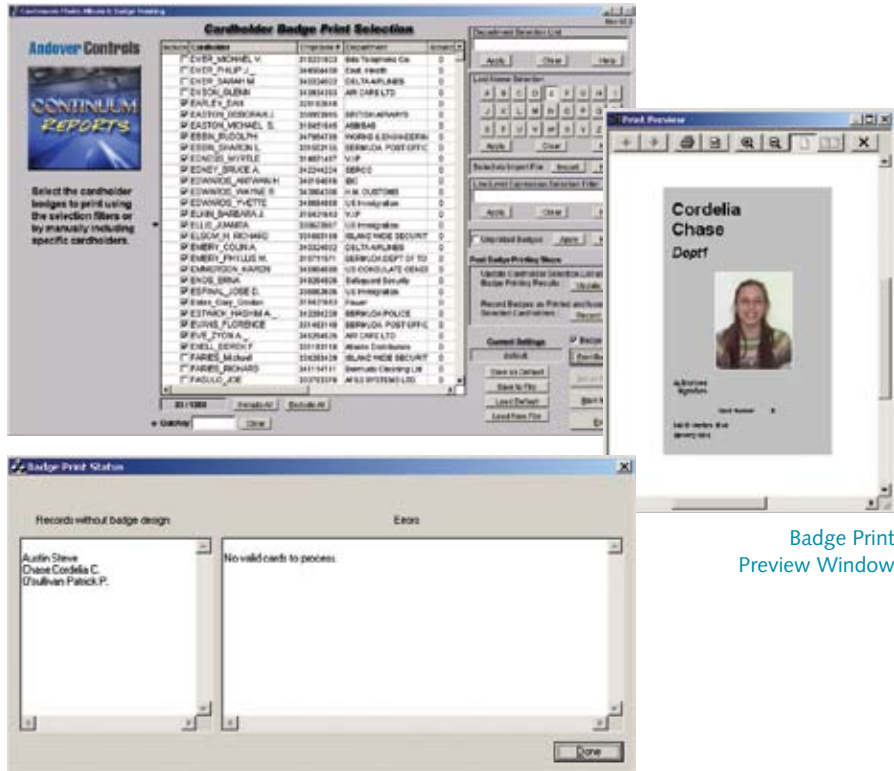

Three-Column Page Format Sorted By Name

BADGE PRINTING OPERATION

Andover Continuum's Badge Printing utility allows you to print/reprint badges one at a time; or in batches by last name, by department, or by selecting to print all unprinted badges only. A "Print Review" feature allows you to view each badge before it is printed. If there are any errors, either before or after printing, they will appear in the Badge Print Status Window. The administrator has control over the recording of successful badge printing. This feature proves extremely useful after a printer jam, by eliminating the need to reprint the entire queue of badges.

Note: Badge printing requires the Andover Continuum Badging Option.
